

## KID'S PLAYGROUNDS

**Slides** are made of high - strength polyethylene, which gives it the most benefits over metal analogues:

- No rust
- Lighter
- Warmer
- Can be easily fixed in any place

Our company produces different elements of kid's playgrounds:

- Sandbox
- Slide (regular, double)

### Sandbox

With our sandbox elements you can construct sandbox of any geometry. Elements of the sandbox with the help of the tubes are connected in a closed loop. Free pipe sections mounted in the ground. After the assembly, for a secure fit, it is recommended to fix the pipe 4 screws and lock securely in the ground.
