

## SEPTIC TANKS

Our company produces Septic Tanks with capacity 1 500, 2 000 and 3 000 Litres.

Septic tank - the construction cleaning small amounts of wastewater. Septic tank is an underground sump of horizontal type, consisting of one or more special containers, through which the liquid waste flows. Canalisation is made by means of municipal utility systems In cities and towns at cities and towns. If there are none such systems, individual sewage treatment systems can help.

The wall thickness of such tanks - 8 mm, which allows to dig them into the ground to a depth of 2 m. Tanks can be connected to the system of tanks. The system can be designed for service as a home and a few private houses. Septic Tanks GG 2 000 and GG 3 000 are equipped with the basket for filter material.

**GG 1 500**

**GG 2 000**

**GG 3 000**

### Advantages of our septic tanks:

- Filter to additional water treatment
- Overflow control system, which prevents the release of sediment and floating pollutants
- Not surface sutures, which eliminates the possibility of leaks

Type	Volume, l	Dimensions, l x w x h (mm)
GG 1 500	1 500	1500 x 1 230 x 1 230
GG 2 000	2 000	2 230 x 1 280 x 1 260
GG 3 000	3 000	2 360 x 1 500 x 1 600
